

elsewhere. We have wonderful universities, and this bill would greatly impede their ability to continue to provide world-class education. If you don't want to see this bill passed, contact Speaker Stephan's office to voice your opposition at either rep93@ohiohouse.gov or 614- 466-1366.

Reproductive Rights Press Conference

On Tuesday June 25th, I held a press conference to bring attention to the package of reproductive rights bills. **HB 343**, **HB 502**, and **HB 565** build upon the rights now guaranteed in our state Constitution. They would repeal archaic restrictions on abortion care, protect IVF, and require that crisis pregnancy centers provide real and unbiased medical care with the state dollars they receive. With the potential for a national abortion ban at the federal level, it is imperative that we protect the will of the voters here in Ohio and continue to work on improving maternal and infant mortality through common sense legislation.

I am grateful to my joint sponsors on these bills, Rep. Liston, Rep. Brown-Piccolantonio, and Rep. Grim for their support and dedication to these bills.

In the News

It was an honor to speak with Jake Tapper on CNN about the Supreme Court decision to not hear the case about the FDA authorization of mifepristone. This is an encouraging decision by the Supreme Court because it means this live-saving medication will remain available across the US.

However, due to the lack of federal level protections of other reproductive rights issues, this fight is not over. To watch the full interview, click

HB 565, a bill that I introduced alongside Rep. Grim, seeks to regulate crisis pregnancy centers that receive state funding. This bill received its 1st hearing in the House Finance Committee on June 18th. Several outlets wrote articles about this important piece of legislation, the links to those articles can be found below:
